CAREER OBJECTIVE

Enthusiastic Full Stack Developer with a strong interest in backend development and API integration using the MERN stack. Seeking an entry-level opportunity to apply programming knowledge and improve practical development skills.

EDUCATION

Adithya Institute of Technology	B.E (EEE)	84.2%	2022 - 2026
Suburban Mat. Hr. Sec School	HSC	75.3 %	2020 - 2022
Elsie Mat. Hr. Sec School	SSLC	74.4%	2019 - 2020

PROJECTS

Smart Women's Safety System - MERN + IoT (Final Year Project) | [GIT REPOSITORY](#)

Tech Stack: Node.js, Express.js, MongoDB, Socket.IO, React.js, ESP32

- Designed and implemented RESTful backend services for emergency alert handling and GPS data processing, integrated real-time communication using Socket.IO, structured MongoDB schemas for efficient user and alert data management, and ensured secure API routing with proper validation logic.

Symposium Event Website | [GIT REPOSITORY](#)

Tech used: HTML, CSS, JavaScript, VS Code

- Developed a responsive symposium website using **HTML, CSS, and JavaScript**, featuring interactive elements for enhanced user engagement and seamless accessibility across devices.

EXPERIENCE

AI Engineer Trainee Intern

Dr. Madhan Institute of Future (DMIF) | Remote

Mar 2026

- Contributing to AI research, model experimentation, and applied product development while supporting learner mentorship and technical content creation in a performance-driven environment.

Full Stack Developer

Adventure Technologies

March 2026 - Present

- Contributing to product enhancement, debugging and deployment processes while ensuring smooth functionality and efficient user experience across web applications.

TECHNICAL SKILLS

Languages: JavaScript, Java

Backend: Node.js, Express.js

Frontend: React.js, HTML5, CSS3

Database: MongoDB

Tools: Git, GitHub, Postman, VS Code

Concepts: REST APIs, OOP, Client-Server Architecture

CERTIFICATIONS

- Completed C, C++, Java course from TECMAC Computer Education.  **2024**
- Completed Online Web Development Internship from Internpe.  **2025**
- Completed HTML & CSS Program from Error Makes Clever.  **2025**
- Participated and secured wins in various Technical events such as Paper Presentations, Hackathons and Technical quizzes conducted at Technical symposiums across multiple colleges.  **2022 - 25**
